PROFESSIONAL SUMMARY

I'm an MCA graduate and aspiring Cloud & DevOps Engineer focused on building reliable, automated and cloud-native infrastructure.

I have hands-on experience working with Linux, AWS, Docker, Kubernetes, Git, GitHub, NGINX, Argo CD, Jenkins, Terraform and Bash through practical training and projects.

- Deploying containerized applications using Docker and Docker Compose
- Working with AWS EC2, S3, IAM, VPC, Security Groups and AWS CLI
- Managing Kubernetes Deployments, Services, ConfigMaps, Ingress and namespaces
- Implementing GitOps workflows using GitHub and Argo CD
- Practicing Kubernetes self-healing and drift detection
- Configuring NGINX as a web server and reverse proxy
- Using Linux commands, Bash scripting, Docker logs and curl for troubleshooting
- Working with Git/GitHub-based development and deployment workflows
- Exploring CI/CD, Infrastructure as Code and cloud-native deployment practices

I'm particularly interested in opportunities as a:

- ☞ Cloud Engineer
- ⚙️ DevOps Engineer
- 🔧 Site Reliability Engineer (SRE)
- 🔥 AWS Engineer
- ☞ Cloud Infrastructure Engineer

I'm open to entry-level opportunities where I can contribute to real-world infrastructure and automation projects while growing as a Cloud/DevOps professional.

TECHNICAL SKILLS

Cloud & AWS: EC2, S3, IAM, VPC, CloudWatch, AWS CLI, Security Groups, Subnets, Route Tables

DevOps & Automation: Git, GitHub, Jenkins, CI/CD, Argo CD, GitOps, Bash

Containers & Orchestration: Docker, Docker Compose, Kubernetes, Minikube

Infrastructure & Web: Terraform, NGINX, Ingress, Linux networking, HTTP/HTTPS

Programming & Data: Python, Flask, MySQL, SQL, HTML, CSS, JavaScript

Operating Systems: Linux, Ubuntu, Windows

PROFESSIONAL EXPERIENCE

Cloud & DevOps Intern — ACTE | Bengaluru, Karnataka | 2026

- Practiced AWS services including EC2, S3, IAM and VPC with hands-on cloud networking exercises.
- Worked with Linux administration, Bash scripting, Docker and Kubernetes for system management, containerization and application deployment.
- Used Git, GitHub, Jenkins, Argo CD, NGINX and Terraform for version control, CI/CD, GitOps, web-server management and Infrastructure as Code.

PROJECTS

Kubernetes NGINX High Availability with Argo CD (GitOps) | Kubernetes | Minikube | Docker | NGINX | Argo CD | GitHub | YAML

- Built a GitOps-based Kubernetes deployment with GitHub as the source of truth and Argo CD for automated synchronization.
- Configured Kubernetes Deployments, Services, ConfigMaps, Ingress and namespaces; used two replicas for availability.
- Practiced self-healing and drift-detection scenarios and validated deployments, services and ingress with kubectl.

NGINX Page Rotation Application | AWS EC2 | Linux | Docker | Docker Compose | NGINX | Bash | GitHub

- Containerized an NGINX web application with Docker Compose and deployed it on an Ubuntu AWS EC2 instance.
- Automated page rotation using Bash and Linux symbolic links, and validated the service with curl and Docker logs.
- Followed a Git-based release workflow from local changes to GitHub and EC2 deployment.

Food Ordering System — Kubernetes Deployment | Python Flask | MySQL | Docker | Kubernetes

- Developed a web-based food ordering application and containerized the frontend and backend.
- Deployed the application on Kubernetes using Deployments and Services and tested service-to-service connectivity.

EDUCATION

Master of Computer Applications — Saveetha University

CGPA: 7.59 | 2024–2026

Bachelor of Computer Applications — VIT University

CGPA: 6.94 | 2021–2024

CERTIFICATION

Cloud Computing Training — ACTE, Bengaluru

LANGUAGES

Tamil, English
